

Lenovo Capacity Planner

Introduction to LCP

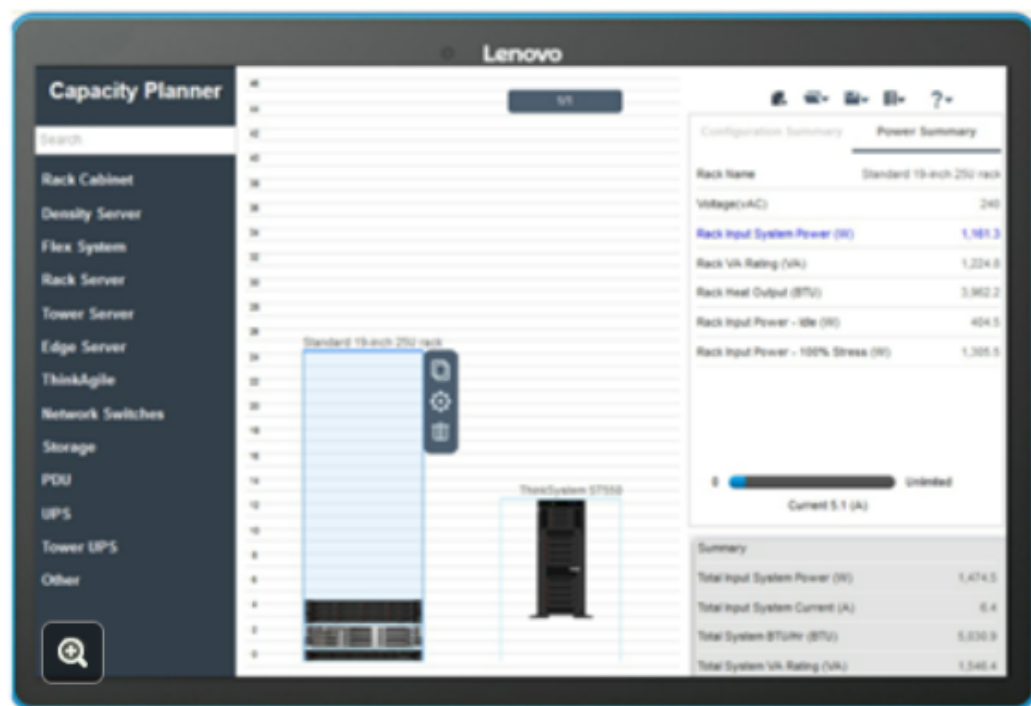

Lenovo

What is Lenovo Capacity Planner?

Lenovo Capacity Planner (LCP) is a power consumption evaluation tool that calculates power consumption levels for customized server configurations before actual deployment.

There are both online and offline versions of LCP. To use LCP online or to download LCP, go to the LCP Lenovo Support website:

<https://datacentersupport.lenovo.com/us/en/products/solutions-and-software/software/lenovo-capacity-planner/solutions/ht504651-lenovo-capacity-planner-lcp>
