ThinkSystem tools for the ThinkSystem V4 platform

ES52678

September 2024

Lenovo

Prerequisites

- [ES52374 – ThinkSystem tools for the ThinkSystem V3 platform](#)
- [ES42692 - Intel Xeon processor architecture for ThinkSystem V4 servers](#)

Objectives

After completing the course, you will be able to:

- Describe the new features of the software tools supported by ThinkSystem V4 servers
- Describe the difference between the software tools used on ThinkSystem V3 and V4 servers
- Describe the features introduced in the newer versions of existing software tools that support ThinkSystem servers

Overview

The following software tools have been updated to support the ThinkSystem V4 platform:

- UEFI
- Lenovo XClarity Essentials (LXCE)
 - OneCLI
 - UpdateXpress
 - BoMC
- Static Bundle:
 - Formerly known as UpdateXpress System Pack (UXSP)
 - The name change will take place with the release of the BHS platform
- Lenovo XClarity Administrator (LXCA)
- Lenovo XClarity Controller 3 (XCC3)
- Lenovo XClarity Provisioning Manager 5 (LXPM5)

The new versions of these software tools will be introduced in more detail in the following sections.
