

RAS features

Xeon 6 reliability, availability, and serviceability features

The Lenovo logo is positioned in the top right corner of the slide. It consists of the word "Lenovo" in white, sans-serif font, oriented vertically within a red rectangular background.

Lenovo

Xeon 6 RAS enhancement

Xeon 6 includes the following RAS enhancements:

- Supports the run-time post-package-repair (PPR) feature with DDR5 DIMMs, extending memory lifetime
- Supports CXL 2.0 RAS features
- Offloads specific RAS error handling to the BMC, minimizing processor system management interrupt (SMI) usage and improving processor performance
- Supports core lockstep mode, which improves processor error detection ability

For more information about Xeon 6 RAS, refer to the following Intel documentation:

Summary

This course enabled you to:

- Describe the features of Intel Xeon 6 processors in ThinkSystem V4 servers
- Identify the differences between Intel Xeon 5 (Eagle Stream) and Intel Xeon 6 (Birch Stream) Scalable processors
- Describe the Intel Xeon 6 processor naming rules
- Describe the supported memory features on ThinkSystem V4 servers with Intel Xeon 6 processors
